

## Outgrowing your basic accounting solutions? Become more responsive and efficient for a low monthly fee.

Are you frustrated by the lack of a complete view of your business and proper controls? Can you and your team easily do business whether you're in the office, from home, or on the road? Worried about the cost of a new system?

Your business has successfully grown to the point where you need a business management solution to accelerate your operations, get more control and eliminate complexity, and collaborate efficiently, but you're hesitant to make a commitment of that magnitude because of the financial cost coupled with the anxiety of locking yourself into a system that might not be able to meet your future needs.

### Get a full business management solution—delivered conveniently.

**Sage 300 Online** is the answer to your concerns. We designed it to be a next-level solution for QuickBooks and Sage 50 users who have simply outgrown their current accounting solutions and who need something more robust to keep their business running smoothly and profitably.

Since Sage 300 Online is a cloud-based subscription service, there is no costly hardware to buy and maintain, no servers, just a Windows Explorer browser and Internet connection. You simply pay a reasonable setup fee and a low monthly subscription to access the powerful features and capabilities of a best-in-class business management system so you can be responsive, get more control, and accelerate collaboration.

With Sage 300 Online, you can access financial and operational data anytime, anywhere online through an Internet connection. With intuitive dashboards, predictive analytics, and automatic reporting, you'll be able to bring order to spreadsheet chaos and make better and faster decisions.

- Become more responsive and efficiently run business for a low monthly fee.
- Get bank-level data security in the cloud and stay in compliance.
- Your team will work together efficiently moving your business forward, without having to meet.
- Everyone can be more responsive and provide better customer service because everything that's needed is in one always-up-to-date system.

60% of small businesses find themselves limited by the ERP choices they made when starting up.<sup>1</sup>

47% of organizations surveyed plan to move their core ERP systems to the cloud within five years.<sup>2</sup>
